

MANN-FILTER Product Information

No 97
13/02/2018

The silver oil filter series W 712/93, /94 and /95

MANN-FILTER improved the filter medium of spin-on filters for vehicles with 1.0l, 1.2l and 1.4l Otto engines analog to the original part.

The high-performance filter medium is made of synthetic fibers. This enables a very good stability against aggressive oils and reaches a high dust holding capacity besides. Due to that, the change interval of the filter increases.

To make this technical change clearly visible, the new filters have been painted silver.

All replaced and improved filters at a glance:

Black		Silver
W 712/90 (03C 115 561 B)	➡	W 712/93 (03C 115 561 J)
W 712/91 (03C 115 651 D)	➡	W 712/94 (03C 115 561 H)
W 712/92 (04E 115 561 B/D)	➡	W 712/95 (04E 115 561 H)

Note

The MANN-FILTER oil filter W 712/90 and W 712/93 are not interchangeable with the W 712/91 and W 712/94.
Reason: For the service-friendly change of the filter an additional seal is installed at the filters W 712/91 and W 712/94.
