**MANN  
FILTER**

## New MANN-FILTER C 25 024 CV Air Filter Saves time and fuss!

### C 25 024 replacement procedure:

**1**

Tilt cab as per vehicle manufacturer's procedure.

**2**

Remove clean air duct from air cleaner housing

**3**

Remove used filter element and discard. Notice the drain hole cut into the housing base.

**4**

Use a low pressure hose to flush any dirt / debris from the housing through the drain hole

The new **MANN-FILTER C 25 024** for Scania New Generation applications 2016> incorporates an innovative 'seal and drain' mechanism which simplifies and shortens element servicing.

Dirt and debris can easily be flushed from the housing while replacing the element, saving significant time over conventional servicing procedures.

For more information please scan the QR code below to watch the YouTube installation video.

Video:

**5**

Dry the inside of the housing

**6**

Install a new C 25 024 allowing the bottom end cap protrusion to seal the drain hole (see YouTube video for correct positioning)

**7**

Reinstall the clean air duct

**8**

Job done - make a coffee!
