

Front shock absorbers

BMW Serie 3 E90 / E91 / E92 / E93

FI129EU

Particularity of front shock absorbers ref. E7070 and E7072

Berline 4 door E90

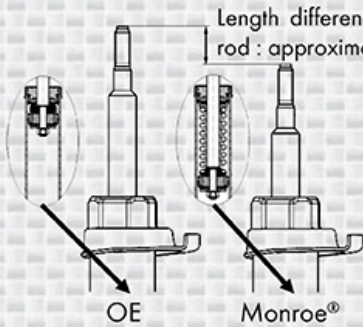

Touring E91

Coupé E92

Cabriolet E93

Length difference of the relaxed rod : approximately 50mm

In order to ensure a better quality and better longevity, Monroe® brings improvements in the manufacturing process of these shock absorbers : inner buffer is substituted by a rebound spring.

Because of this improvement, Monroe® shock absorbers have the same technical characteristics, except the length of the rod (relaxed shock absorbers).
