

# MATERIAL SPECIFICATION

**TEXTAR**

## Textar D7115

### Class:

Premium / OE

### Application:

Truck

### Features and Benefit:

Textar D7115 is a material developed in the OE and has an excellent reputation in the market as one of Textar's premium lining materials. The material has been developed for S-Cam and Z-cam brakes in trucks. Textar D7115 exhibits amongst other advantages, good stability under high temperature load and good fade resistance. The material is kind to the drum and thus it can be used in applications where drum wear and cracks are critical. All this is achieved even with a medium to high level of friction.
