

Difference between pad sets MDB3767, MDB3824 and MDB2604

We would like to inform you about the difference between passenger car pads MDB3767, MDB3824 and MDB2604.

For some models VAG-Group uses brake pads with slightly different widths of the backing plate. This is a result of multiple years development of the brake manufacturer and shall ensure an optimal operation of the brake pads.

MINTEX follows this approach and added corresponding pad sets to range.

Due to this reason backing plates in pad set MDB3767 and MDB3824 are all 155,1mm wide whilst on pad set MDB2604 backing plates are 155,1 resp. 156,3mm wide.

Exact allocation is based on PR-numbers of VAG. You find this information in the service booklet of your vehicle.
