

Single-source solution: MEYLE full-service tripod joint kits for VAG models

To fit VW | Audi | Skoda | Seat | Opel | General Motors | Vauxhall models.

Continual load change can cause the tripod rollers to wear into the housing which will result in joint play and unpleasant noise, for example when cornering. The full-service MEYLE tripod joint kits allow independent workshops to perform cost and time-effective tripod joint repairs.

The benefits of MEYLE full-service tripod joint kits at a glance:

- Full set of OE-quality mounting parts included to simplify tripod joint repair and save repair professionals the tiresome task of ordering all required parts separately
- High-performance grease specially formulated to the requirements of tripod joints
- Reduced friction and wear thanks to the high-performance grease, thereby significantly improving the joint's load-bearing properties
