

Technical Information: starters 220027

GENERAL INFORMATION

For Mercedes A-Class vehicles (MY from 1996 to 2003) are used two different starter motors, very closed one to the other but not interchangeable.

220027 (with label Valeo D7E18) has a standard solenoid.

220403 (with label Valeo D7ED28 or D7ED281 and code 049) has a specific solenoid piloted by the vehicle ECU.

The Official dealers are able to identify the right starter using the Vehicle Identification Number, VIN, chassis number.

For this reason, each claim or return must be accompanied by VIN.
